Subject: Equipment demob, Tuckers, Disposal Capacity

Brent,  
I appreciate our discussion this morning at the objectives meeting that determined no water operations equipment will be demobilized until it's determined by Unified Command that the resource is no longer needed in a different area of the response effort.

Regarding Tuckers Bayou, lets brainstorm some aggressive options to address any residual incident related waste in the Tuckers ditch area or Tuckers Bayou, such that it would expedite the cleanup progress.

Regarding disposal capacity, please take steps today to begin the process to establish more waste disposal capacity, so as to not impact the on-going recovery operations on the water.

Respectfully  
Adam
